

AUTOMATIC AIR AND GAS VENTS FOR LIQUID SYSTEMS AE37.2

(Carbon steel ; 11/2" x 1" and 2" x 1" - DN 40 x DN 25 and DN 50 x DN 25)

DESCRIPTION

The AE37.2 range of high capacity automatic vents are designed to remove air or gases from water and other liquid systems, without requiring any external source of energy.

They are capable of handling significant loads during start-up while still being able to discharge smaller loads in continuous modulating operation with one single orifice.

These ball float type vents are manufactured in carbon steel, available with various soft sealing options, and can be used in combination with other air elimination and separation systems or directly applied at high points in the pipelines.

MAIN FEATURES

Suitable for start-up and continuous operation with one single orifice. Allow fast and easy inline maintenance. Corrosion resistant internal parts. No balancing pipe required.

OPTIONS:	Various soft sealing options.
USE:	Cold, hot and superheated water or other liquids compatible with the construction.
AVAILABLE MODELS:	AE37.2-10, 20 and 32 – carbon steel.
SIZES:	11/2" x 1" and 2" x 1"; DN 40 x DN 25 and DN 50 x DN 25.
CONNECTIONS:	Female threaded ISO 7 Rp or NPT. Flanged EN 1092-1 PN 40. Flanged ASME B16.5 Class 150 or 300. Socket weld (SW) ASME B16.11.
INSTALLATION:	Inline vertical installation. It must be installed absolutely vertically at the points in the plant where the air tends to collect. See IMI – Installation and maintenance

MAX. ΔP: AE37.2-10 – 10 bar AE37.2-20 – 20 bar AE37.2-32 – 32 bar

Values shown refer to capacities of air discharge at 15 °C, under atmospheric pressure (1013 mbar).

If the air temperature differs from 15 °C, the discharge capacity can be corrected by multiplying it by $\frac{288}{273}$, where T is the actual temperature in °C. It may be assumed that the temperature of the air is equal to the temperature of the water. 273 + T
