

BIMETALLIC STEAM TRAPS AND AIR VENTS BM90

DESCRIPTION

The BM90 is a series of robust and efficient bimetallic steam traps and air vents. These steam traps are recommended for steam process applications where sensible heat can be recovered, such as steam tracing lines, drip points, storage tank coils and steam air venting. Specially designed for draining high pressure superheated steam lines and processes.

MAIN FEATURES

Modulating discharge. Discharges condensate below steam saturation temperature. Excellent air discharge. Operates with superheated steam. Unaffected by water hammer and vibrations. Built-in strainer.

USE: Saturated and superheated steam.
