

ELECTRIC ON/OFF GLOBE VALVES EV15 (EN)

DESCRIPTION

The ADCATrol EV15 is a series of single seated, two-way electric on/off globe valves with electric actuator. These valves are suitable for use with the most common process fluids such as steam, water, superheated water, air, neutral gases and oils.

MAIN FEATURES

Easy to service.
Compact and cost-effective.
Ambient temperature from -10 to 60 °C (others on request).
24 V AC, 115 V AC, 230 V AC, 400 V AC 50/60 Hz and 24 V DC supply voltages.
Manual operation with disengagement of the actuator motor.
Valve protection against excessive force due to load-dependent seating.
Defined closing force at the end positions leading to tight valve shutoff.
Mechanical stroke indication via anti-rotation bar.

OPTIONS AND

ACCESSORIES: Limit switches.
Heating resistor.

USE: Saturated steam.
Hot and superheated water.
Air, gases and others.

AVAILABLE MODELS: EV15G – SG iron.
EV15S – carbon steel.
EV15i – stainless steel.

SIZES: DN 15 to DN 200.

CONNECTIONS: EV15G – Flanged EN 1092-2 PN 16.
EV15S and EV15i – Flanged EN 1092-1 PN 16 or PN 40.
Standard PN 16 DN 65 flanges are supplied with 4 holes. 8 holes, according to EN 1092-1/-2, on request.
