

## THERMODYNAMIC STEAM TRAPS DT40/2

### DESCRIPTION

The DT40/2 thermodynamic disc steam traps are compact and lightweight, easy to install traps, excellent for high pressure systems and steam tracing applications.

The insulation cover ensures a consistent operation and makes it particularly suitable for those applications where the weather conditions, such as rain and wind, may affect the normal operation. These traps offer a wide operating range, without adjustment and include a bimetal air vent ring which reduces start-up time by preventing air binding.

### MAIN FEATURES

- Intermittent discharge.
- Integral bimetallic air vent to avoid air blockage.
- Complete with insulation cover to reduce heat and efficiency losses.
- Operates on superheated steam.
- The seat and disc can be easily replaced in field without removing the trap from the line.
- Unaffected by water hammer and vibrations.
- Built-in easy-to-clean strainer.

USE: Saturated and superheated steam.
